## Balancing Robots Print onto white cardstock. 1. Color and cut-out both robots. 2. Flip your robot over to the back. Place a small piece of poster putty on the hands of the robot. 3. Press a penny onto each hand. 4. Stick some more poster putty on the pennies. 5. Attach the second robot to the back so you can't see the pennies! 6. To keep the top part of the robot from opening up, you can also place a small piece of putty between the two robot bodies to hold them together. 7. Now you you can balance the robot on your finger under her face!
